[naming our concerns about neuroscience a review of](#)

One can recognize a clear Cartesian dualism in cognitive neuroscience, even if "mind" is largely replaced by "brain," and even when the brain's activity is measured. Bennett and Hacker recognize this fact of modern cognitive neuroscience, and criticize it thoroughly in their book, Philosophical Foundations of Neuroscience. They write:

[seven misconceptions about the mereological fallacy a](#)

If someone commits the mereological fallacy, then he ascribes psychological predicates to parts of an animal that apply only to the (behaving) animal as a whole. This incoherence is not strictly speaking a fallacy, i.e. an invalid argument, since it is not an argument but an illicit predication.
